

I am writing to express my concern that the implementation process for expansion of LPFM may force valuable existing FM translator services off the air. Specifically, I and my family of 6, listen to KLOVE on 93.1 in San Antonio (and 106.3 and 92.1 in the surrounding area) and do not want to lose this important service in the expansion of LPFM services. KLOVE provides a valuable service in my community with appropriate music and news that does not need to be censored or filtered for my children's sake, as many local radio stations must. It also provides a positive and encouraging message that improves my daily outlook and that of my family. The loss of KLOVE on this FM translator in my community would be significant and irreplaceable, and it serves the community interest to ensure that this station is not removed in the proposed expansion of LPFM services.
